

Dale Hachtel and I stopped in at Jackson Autobody today and picked up the dome sections which they repainted for us. The finish looks "luxury auto perfect" ! They are now in Gary Nordick's barn as we wait for his siding guy to put steel siding on the observatory walls. Then we will have another club work session to reassemble the dome. Rusty has ordered the dome opener for us. Thank you to everyone who has helped with this project and please watch for upcoming emails.

Clear skies,

Al Sheidler
